... Bizerba K-class flex cash register and weighing systems ...

K classflex
... The Key to Added Value ...

+

+

+

+

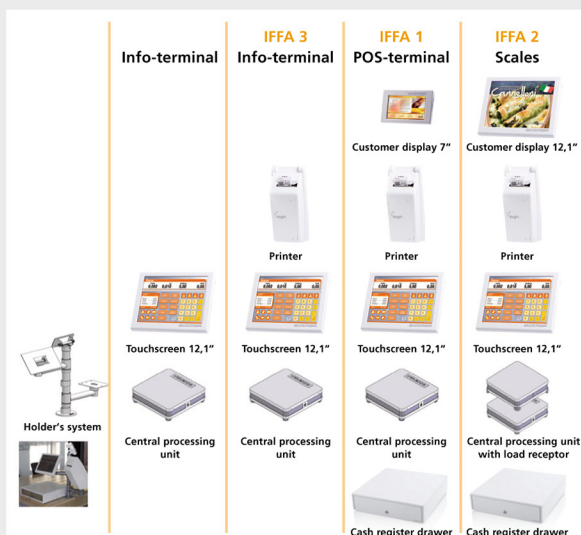

With K-class flex, individual components such as the printer, touch screens and weighing terminals can be freely combined to create space-saving individual solutions. Anything is achievable – from an info-terminal with or without a printer to a cash register function alone or a full weighing function.

Take advantage of these new and previously unseen uses. Stand-alone or new counter concepts within one weighing system – all in the same attractive design and centrally controllable from the back office, like the entire K-class series, using the Bizerba .RetailFramework software. The separable nature of the display and load receptor means that every K-class flex variation can be flexibly adapted to the operating procedures in question. And the fact that the printer, cash register drawer and central processing unit can be stored under the counter means that only a small area of space is required for the device. Whether used with or without scales, K-class flex integrates perfectly and ergonomically into any setting. All components of the cash register/ weighing solutions such as the display and printer are fitted with standard VESA mounts to secure them to the support system.

A whole new level of flexibility in functionality, ergonomics and positioning – simply install and operate.

K-class flex includes:

- User scales in a space-saving and ergonomic design
- Counter cash registers as an additional cash register point within the weighing system
- Cash register for checkout lines with checkout scale integrated in conveyor
- Cash register with scale for fruit and vegetables
- Price labelling terminal with advertising option
- Info-terminal, e.g. about food services/party services or consumer advice

Everything you always wanted

- Continuous operation from the scales to the cash register
- One method of operation for all scales and cash registers
- Data management for the cash register, scales, info-terminal and cash accounting from one device
- Central evaluation of the inventory management and cash accounting
- No open tickets at the end of the day
- Use of Bizerba values and advertising for cross-selling and upselling

Shown with Cradle Mount and optional wings

ON DEMAND SEAL PLATE
SIGNIFICANTLY REDUCES ENERGY CONSUMPTION

FEATURES

- 115 Volt Power Supply
- Self-Regulating Boardless Square Rod for Increased Transversal Rigidity and Consistent Cutting
- Easy to use Photoeye for Accurate Product Detection
- 8" by 15" On-Demand Timer Controlled Heated Seal Plate That Significantly Reduces Power Consumption
- Seal Plate Reaches Seal Temperature Within Seconds
- Thermostatic High Temperature Limit Device
- Thermistor Controlled Circuit That Reduces Power Consumption As Residual Heat Increases In Seal Plate
- GFCI for Improved Circuit Integrity and Protection
- Stainless Steel Front Plate for Easy Wipe Down
- Rigid Aluminum And Stainless Steel Construction Throughout
- Stainless Steel Wrapping Surface
- 20" Maximum Roll Width
- 8" Maximum Roll Diameter
- Supplied With A Replaceable Non-Stick Cover to Maintain A Hygienic Seal Surface
- Splash Guard
- Utility Rebates may be Available

MODEL SPECS

MODEL	200ESC	200ESA
FILM MOUNT	NEW Cradle System	Axle System
FILM CAPACITY	20"	
SEAL PLATE	8" x 15"	
WORKING HEIGHT	Adjustable Height, Standard 31"	
OVERALL DIMENSIONS	24" D, 25" W, 36" H Standard (61 D, 63.5 W, 92 H cm)	
POWER REQUIREMENT	115 Volt, 16 Amp, 60Hz  20A breaker, compatible with NEMA 5-20P (shown)	
SHIPPING WEIGHT	90 lbs. (12 kg)	

AVAILABLE OPTIONS

- 6" x 15" Hot Plate
- Axle or Cradle Film Mount
- All Stainless Steel Wing, 14" x 22" (R/L)
- Accessory Storage Rack
- All Stainless Steel Construction
